**Areas and Techniques of Surgical interest and Experience over a decade:**

***Aesthetic rhinoplasty:*** Experience of fifteen years in relation to nose operations, performed more than 350 nosejobs by different methods of rhinoplasty. Well versed with both open and closed methods of nosejob. He has an experience in usage of various implants and grafts for nose. Practices complete nasal septal delivery and extracorporeal correction for crooked nose deformities. Last but not least is experience in performing surgeries on south Indian noses which is a challenging task due to more prevalence of thick nasal skin, bulky nose tip deformities and low nasal height.

***Liposuction and Lipoplasty:*** Performed more than 350 liposuctions for indications like liposculpture, spot reductions and obesity. More than six years experience in PAL (Power Assisted Lipoplasty ) technique. Our center is one of the earliest to use powered equipment for liposuction. It facilitates easy and faster fat removal. Recently we have started using VASER also for liposuction.

Dr venkataramana is experienced in performing large volume liposuctions in single stage for overweight and obese individuals. Largest total volume removed at a single stage safely was about 18 liters.

***Cosmetic breast surgery:*** Breast augmentation, breast reduction and mastopexy. Performing transaxillary method/ approach implant insertion with the help of Endoscope. Well versed in performing all the methods of implant placement, ie, inframammary, peri-areolar and transaxillary approach so that scar will be concealed and can also perform in unmarried and brown skinned female .

**Facial plastic surgery:** In view of experience in ENT and Head-Neck surgery, Facio-maxillary fractures, face lifts, soft tissue fillers, implants for chin , cheek etc are being performed regularly.

**Hair transplantation:** Follicular unit hair transplantation, advanced method of hair transplantation.
